mini smilift vacuum lifter
Load handling made easy

mini smilift the small companion

mini smilift, allows you quick and frequent movement of loads up to 60 kg either in cartons, boxes and bins or as individual items such as plates and machine parts. For your customized solution, our product is available in different sizes:

Typ	Load capacity kg	Lifting tube mm (Ø)
mini smilift 80	20	80
mini smilift 100	35	100
mini smilift 120	45	120
mini smilift 140	60	140

With an installation height of 2.900mm, the standard lifting height is up to 1.800 mm.

This compact unit is light and flexible with one-hand-control for pick and place applications in frequent handling operations. It can be equipped with a range of attachments for use with many types of load in production,

warehouse and despatch areas. Mini smilift is also available in stainless steel and ATEX version. The small companion is easily and quickly installed and can be integrated into existing installations and work flows.

Control Units

Our customers can choose between either the standard compact mini smilift or the extended handle option, for tricky objects.

Vacuum pumps

mini smilift can be powered either by compressed air or by electricity. Ejector vacuum pumps for compressed air are integrated into the top of the lift units.

Potential load lifting attachments for carton boxes, canister and coils
